The Fresno 41 Fix is a major bridge deck rehabilitation taking place on State Route 41 in Fresno, between State Route 99 and State Route 180. Work is scheduled between September 2019 and November 2019.

Improvements will include: Overlaying worn deck surface with a new surface, reconstructing joints, and installing new approaches and pavement delineation for the South Fresno Viaduct Bridge. Caltrans maintenance crew will also perform several maintenance functions such as graffiti removal, debris and litter abatement, landscaping, and nearby bridge maintenance.

Weekend closures will save 145 working construction days and reduce lane closures from 165 to only 20 days. Signed detours will be in place. Use State Route 99 or State Route 180 for detour access.

This work is scheduled to occur on the dates listed above. Closures each day are subject to change due to traffic incidents, weather or uncontrollable events that may occur during construction.
